

# PLANNING FOR YOUR CABINET PROJECT

## Step 1: Sketch Project Area

**Details to include in your sketch:**

- Location of plumbing
- Location of gas and electric (range, oven, etc.)
- Location and size of appliances (refrigerator, microwave, etc.)
- Location of walls (including cabinet walls), doors, or windows

**Tips for Successful Measurement:**

- Don't measure from the actual opening. Measure from the outside casing instead.
- Measure the ceiling height, which determines the height of the upper cabinets

\* Does not need to be to scale as long as dimensions are correct.

# PLANNING FOR YOUR CABINET PROJECT

## Step 2: Gather Inspiration

### Bring to your appointment:

- Photos of your project area
- This planning worksheet
- Creative references, from paint swatches to magazine clippings and Pinterest boards

### Things to think about:

- What is the optimal functionality of your project area?
- How does your project area interact visually with adjacent spaces?
- The color and material of existing or replacement appliances and accessories—such as refrigerators and light fixtures.

## Step 3: Schedule an Appointment

Our cabinet experts are here to help make your cabinet project a success.

Visit a cabinet showroom at our Lake Union, Bellevue, or Lynnwood location, or schedule an appointment with one of our cabinet experts at [www.dunnlumber.com/pass](http://www.dunnlumber.com/pass)
